

ANNUAL HEALTH CHECKUP CHECKLIST

An annual health checkup structured around key body systems provides a comprehensive framework for preventive care and early risk detection. By evaluating cardiovascular, respiratory, metabolic, neurological, musculoskeletal, immune, and reproductive functions in an organized manner, this checklist supports a holistic understanding of overall health status. System-based screening promotes early identification of emerging conditions, reinforces preventive strategies, and facilitates informed medical decision-making. Such a structured approach enhances continuity of care, strengthens long-term health planning, and contributes to improved overall well-being.

1 Nervous System and Mental Health

1.1 Cognitive Function

- ☐ Memory and concentration assessment
- ☐ Balance and coordination evaluation
- ☐ Neurological reflex check (if indicated)

1.2 Mental and Emotional Health

- ☐ Depression screening
- ☐ Stress level assessment
- ☐ Burnout risk assessment
- ☐ Anxiety screening
- ☐ Sleep quality evaluation

2 Cardiovascular System (Heart and Blood Vessels)

2.1 Clinical Evaluation

- ☐ Blood pressure measurement
- ☐ Cardiovascular risk scoring (age, family history, cholesterol, smoking)
- ☐ Resting heart rate

2.2 Diagnostic Tests

- ☐ Lipid profile (Total cholesterol, LDL, HDL, Triglycerides)
- ☐ Fasting glucose / HbA1c
- ☐ Electrocardiogram (ECG) if age/risk appropriate
- ☐ High-sensitivity CRP (if indicated)

3 Respiratory System (Lungs and Oxygenation)

3.1 Assessment

- ☐ Respiratory rate
- ☐ Oxygen saturation
- ☐ Smoking status evaluation

3.2 Testing (if risk factors present)

- ☐ Spirometry (lung function test)
- ☐ Chest imaging (if clinically indicated)

4 Endocrine and Metabolic Function

4.1 Thyroid Function

- ☐ TSH (primary screening test)
- ☐ T3/T4 if abnormal or symptomatic

4.2 Metabolic Health

- ☐ Fasting blood glucose
- ☐ HbA1c
- ☐ Insulin resistance markers (if indicated)
- ☐ Body Mass Index (BMI)
- ☐ Waist circumference

4.3 Nutritional Markers

- ☐ Vitamin D
- ☐ Vitamin B12
- ☐ Iron studies (Ferritin)

5 Hematologic and Immune System

5.1 Blood Health

- ☐ Complete Blood Count (CBC)
- ☐ Iron profile (if fatigue or anemia risk)

5.2 Immune Review

- ☐ Vaccination status review
- ☐ Inflammation markers (if clinically indicated)

6 Liver and Kidney Function (Detox and Filtration)

6.1 Liver Function

- ☐ ALT, AST, ALP
- ☐ Bilirubin

6.2 Kidney Function

- ☐ Creatinine
- ☐ BUN
- ☐ Estimated GFR
- ☐ Urinalysis (protein, glucose, infection markers)

7 Digestive System

7.1 Clinical Review

- ☐ Bowel habit assessment
- ☐ Gastrointestinal symptom review

7.2 Screening

- ☐ Colon cancer screening (age 45+ or risk-based)
- ☐ Stool occult blood test (if appropriate)

8 Musculoskeletal System (Bones, Joints and Muscles)

8.1 Physical Assessment

- ☐ Joint mobility
- ☐ Muscle strength
- ☐ Posture evaluation

8.2 Screening

- ☐ Bone density test (risk-based or age 50+)
- ☐ Vitamin D level

9 Skin and Integumentary System

- ☐ Full-body skin check
- ☐ Mole evaluation
- ☐ Signs of skin cancer

10 Sensory Systems

10.1 Vision

- ☐ Visual acuity test
- ☐ Eye pressure (glaucoma screening)
- ☐ Retinal examination (risk-based)

10.2 Hearing

- ☐ Hearing screening
- ☐ Audiology referral if needed

11 Reproductive Health

11.1 General

- ☐ Sexual health screening
- ☐ STI testing (risk-based)

11.2 Female-Specific (if applicable)

- | | |
|---|--|
| ☐ Pap smear | ☐ HPV screening |
| ☐ Mammogram (age/risk-based) | ☐ Pelvic exam |

11.3 Male-Specific (if applicable)

- | | |
|--|--|
| ☐ Prostate evaluation | ☐ PSA test (age/risk-based) |
|--|--|

12 Functional Lifestyle Assessment

- | | |
|---|---|
| ☐ Nutrition Review | ☐ Physical Activity Assessment |
| ☐ Sleep Hygiene Evaluation | ☐ Alcohol and Tobacco Use Review |
| ☐ Stress Management Review | |
